

AKINOLA VICTOR AYOMIDE

Lead Software Engineer · Full-Stack & DevOps

timivictor565@gmail.com · github.com/alphaboy20023

SUMMARY

Full-stack engineer with hands-on experience across frontend, backend, and DevOps. Led solo end-to-end development of a production two-sided delivery marketplace across 5+ repositories, shipping real-time chat, escrow payments, WebRTC calling, dispute resolution, and admin tooling. Strong across the entire stack — from React/Next.js UIs to Node.js/Express APIs, MongoDB, and CI/CD pipelines.

CORE COMPETENCIES

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS

Backend: Node.js, Express, Java, Spring Boot, MongoDB, Mongoose, RESTful APIs

Real-Time & Messaging: Socket.IO, WebSockets, Kafka, Agora (WebRTC), Redis

Payments & Integrations: Paystack, Webhooks, Escrow & Ledger Systems

State & Architecture: Redux, Zustand, Reusable Component Design, Microservices

DevOps & Workflow: Git, GitHub Actions, CI/CD, Vercel, Netlify, Render, Capacitor (Mobile)

Practices: Agile/SCRUM, Code Reviews, Testing & Optimization

PROFESSIONAL EXPERIENCE

Lead Software Engineer

Deboik Int · Ikeja, Lagos · 02/2025 – Present

- Sole engineer across 5+ repositories (sendrey-server, sendrey-website, sendrey-frontend, sendrey-backoffice, deboik-website), owning all backend, frontend, and DevOps responsibilities.
- Architected and shipped Sendrey — a two-sided delivery marketplace — with real-time Socket.IO chat, runner-matching, escrow payments via Paystack, and a custom double-entry ledger system.
- Built WebRTC video/audio calling (Agora), dispute resolution flows, post-completion payout locking, and push notifications end-to-end.
- Implemented full KYC onboarding with document verification, email/phone OTP, runner ban/strike logic, and an admin review dashboard.
- Developed wallet and payout infrastructure: deposits, withdrawals, Paystack bank transfers, and ledger integrity hooks.
- Implemented Redis-backed real-time presence tracking for live runner/user availability across the platform.
- Built and maintained CI/CD pipelines with GitHub Actions; deployed backend on Render, frontend on Vercel, and managed native mobile builds via Capacitor.
- Designed and shipped a Next.js admin dashboard (DeboikInc backoffice) covering payout approvals, partner management, contracts, and runner oversight.

Stack: React, Next.js, TypeScript, Tailwind CSS, Redux, Zustand, Node.js, Express, MongoDB, Socket.IO, Redis, Kafka, Agora, Paystack, Capacitor, GitHub Actions, Render, Vercel

Backend Software Engineer (Simulation)

JPMorgan Chase · Software Engineering Job Simulation on Forage · January 2026

- Integrated Kafka into a Spring Boot microservice to consume and deserialize high-volume transaction messages using a configurable topic and embedded Kafka test framework.
- Implemented transaction validation and persistence with Spring Data JPA and H2, including entity modeling and balance updates across relational User records.
- Connected to an external REST Incentive API via RestTemplate, processing incentive responses within transactional workflows.

- Verified system behavior using Maven test suites and debugger-driven inspection across message ingestion, DB operations, and external API interactions.

Stack: Java, Spring Boot, Kafka, H2, Spring JPA, SQL, REST API

Software Engineer Intern

Deboik Int · Ikeja, Lagos · 06/2024 – 02/2025

- Built and shipped responsive React and Next.js interfaces from Figma designs, ensuring production-ready UI and consistent user experience.
- Developed and consumed RESTful APIs using Node.js, Express, and MongoDB for authentication, admin workflows, and core application features.
- Integrated Paystack for real-world payment flows including transaction verification and webhook handling.
- Implemented event-driven services with Kafka for email, SMS, and payment processing.
- Built real-time features with WebSockets and integrated Agora for in-app call services.

Stack: React, Next.js, TypeScript, Tailwind CSS, Redux, Node.js, Express, MongoDB, Kafka, WebSockets, Agora, Paystack

Student Software Engineer

Torillo Academy · Ikeja, Lagos · 11/2023 – 04/2024

- Led frontend development for a responsive e-book platform, collaborating with UX designers and backend developers.
- Translated UX wireframes into mobile-first, accessible React components integrated with Django REST APIs.
- Automated deployment pipelines using GitHub Actions and Netlify, improving stability through CI testing.

Stack: React, JavaScript, HTML5, CSS3, Bootstrap, Django REST Framework, GitHub Actions, Netlify

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Material-UI

Backend & APIs: Node.js, Express.js, Django, Spring Boot, REST API Design

Databases: MongoDB, PostgreSQL, SQL, SQLite3, H2

Tools & Platforms: Git, GitHub, GitHub Actions, Vercel, Netlify, Render, Postman, Firebase, Cloudinary, Capacitor

Practices: Responsive Design, Mobile-First, CI/CD, Agile (SCRUM), Component-Driven Development
