Software Engineer | React, Next.js & Spring Boot Specialist | UI/UX Implementation

Results-driven frontend developer with expertise in building responsive, scalable web applications using modern JavaScript frameworks. Experienced in translating design systems into pixel-perfect UI components, integrating REST APIs, and delivering seamless user experiences across devices. Strong collaborator with a focus on clean code, performance optimization, and Agile workflows.

CORE COMPETENCIES

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS
- **Backend:** Java, SpringBoot, Node.js, Express, MongoDB, Mongoose, RESTful APIs
- **Systems & Messaging:** Kafka, WebSockets, Real-Time Communication
- **Payments & Integrations:** Paystack, Webhooks, Transaction Handling
- **State & Architecture:** Redux, Reusable Component Design
- **DevOps & Workflow:** Git, GitHub Actions, CI/CD, Vercel
- **Practices:** Agile/SCRUM, Code Reviews, Testing & Optimization

PROFESSIONAL EXPERIENCE

Full-Time Software Engineer | Deboik Int, Ikeja, Lagos | 02/2025 - present

Backend Software Engineer | JPMorgan Chase Software Engineering Job Simulation on Forage | January 2026

- Integrated Kafka into a Spring Boot microservice to consume and deserialize high-volume transaction messages using a configurable topic and embedded Kafka test framework.
- Implemented transaction validation and persistence logic with Spring Data JPA and an H2 SQL database, including entity modeling and balance updates across relational User records. • Connected the service to an external REST Incentive API using RestTemplate, processing incentive responses and incorporating them into transactional workflows.
- Developed a REST endpoint for querying user balances, returning JSON responses through a Spring controller while maintaining clean architectural boundaries.
- Verified system behavior using Maven test suites and debugger-driven inspection, ensuring reliability across message ingestion, database operations, and external API interactions.

Technology Stack:

Java, Spring Boot, Kafka Apache, H2, Spring JPA, SQL, RESTApi

Software Engineer Intern | Deboik Int — Ikeja, Lagos 06/2024 – 02/2025

- Built and shipped responsive **React and Next.js** interfaces from Figma designs, ensuring production-ready UI and consistent user experience.
- Developed and consumed **RESTful APIs** using **Node.js, Express, and MongoDB**, supporting authentication, admin workflows, and core application features.
- Implemented **event-driven services with Kafka** for email, SMS, and payment processing, improving system reliability and decoupling.
- Integrated **Paystack** for real-world payment flows, including transaction verification and webhook handling.
- Ensured **data consistency using Mongoose transactions**, creating reusable utilities for atomic multi-step operations.
- Built **real-time features with WebSockets** and integrated **Agora** for in-app call services.
- Developed an **admin dashboard** and consumed APIs using **Redux** for state management.
- Led development during key phases of the project and wrote **server-side tests** to validate critical business logic.

Technology Stack:

React, Next.js, TypeScript, Tailwind CSS, Redux, Node.js, Express, MongoDB, Mongoose, Kafka, WebSockets, Agora, Paystack, Git, GitHub Actions, Vercel

Student Software Engineer | Torillo Academy, Ikeja, Lagos | 11/2023– 04/2024

- Led frontend development for a responsive e-book platform, collaborating with UX designers and backend developers to deliver features for content management, user reviews, and ratings.
- Translated UX wireframes and prototypes into mobile-first, accessible UI components using React and responsive CSS frameworks, ensuring cross-device compatibility.
- Built dynamic frontend features with JavaScript and React, integrating **Django REST APIs** for authentication, content delivery, and user interaction functionality.
- Conducted peer code reviews and participated in pair-programming sessions, maintaining high code quality standards and knowledge sharing across the development team.
- Automated deployment pipelines using GitHub Actions and Netlify, reducing manual deployment time and improving application stability through continuous integration testing.

Technology Stack: React, JavaScript, HTML5, CSS3, Bootstrap, Django REST Framework, Git, GitHub Actions, Netlify, Postman

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java

Frontend Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Bootstrap, Material-UI

Backend & APIs: Node.js, Express.js, Django, Spring Boot, REST API Design & Integration

Database: MongoDB, PostgreSQL, SQL, SQLite3

Tools & Platforms: Git, GitHub, GitHub Actions, Vercel, Netlify, Postman, Firebase, Cloudinary, MySQL WorkBench

Development Practices: Responsive Design, Mobile-First Development, CI/CD Pipelines, Agile (SCRUM), Component-Driven Development, Version Control Workflows
